ABSTRACT

Data on enrollment for the 1975-1976 academic year in the New England Regional Student Program is presented. At both undergraduate and graduate levels, the regional program allows eligible students to receive preference in admission among out-of-state applicants in participating states, and to be charged the in-state tuition upon admission. Benefits, eligibility, participating colleges, and application information is explained. Statistics are included in the following categories: total enrollment, sectoral enrollment, enrollment in two-year colleges and institutes, four-year colleges, at the university undergraduate and graduate levels, and in the health professions. Institutional data are provided by type of institution and state (participating states are Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont). Among highlights of the report are the facts that 3,241 students enrolled in 554 degree programs at 65 institutions, that 443 students enrolled in Health Professions Contract Programs including veterinary medicine, for the first time, that there was an almost 10 percent increase in enrollment over the 1974-1975 academic year, and that New Hampshire and Connecticut continue as net exporters of regional students. new england regional student program enrollment report

1975 - 1976

U.S. DEPARTMENT OF HEALTH
EDUCATION & WELFARE
NATIONAL INSTITUTE OF
EDUCATION

HE 011 869

NEW ENGLAND BOARD OF HIGHER EDUCATION

new england regional student program

the undergraduate level

Benefits

Students who meet the eligibility requirements for residents of their state, and the admissions requirements of the institution to which they are applying, will

. . . receive preference in admission second only to resident applicants from the home state of the institution

. . . be charged only the in-state tuition upon admission to that institution.

Eligibility

Qualified New England residents are eligible to obtain the benefits from any of the regional curricula open to residents of their state. Transfer privileges will continue in effect for students from an accredited institution of higher education who are residents of one of the New England states and who meet the particular admissions requirements at the institution and for the course of study in which they wish to enroll.

It is assumed that students accepted into a program of study offered under the New England Regional Student Program will remain in the same field of study. If a student transfers into a program which is not included in the Regional Student Program, out-of-state tuition will, of course, be applicable as of the date of transfer.

There are two eligibility rules:

1 "The Uniqueness Rule" – When a study program is not offered at an in-state institution, a qualified student may apply for enrollment at an out-of-state institution offering that program under the Regional Student Program.

2 "The Proximity Rule" – When a study program is offered at both an in-state and an out-of-state institution, and the out-of-state institution is closer in traveling time to the student's legal residence, that student may apply for enrollment at the out-of-state institution.

State Universities

For New England residents interested in attending a state university, only Rule 1 – "The Uniqueness Rule" – applies.

State Colleges

For residents of **Connecticut, Massachusetts, Rhode Island** and **Vermont** interested in studying a regional student program offered by a state college in one of those four states, both eligibility rules apply. For residents of **Maine** and **New Hampshire** interested in attending a state college, only Rule 1 applies.

Two-Year Institutions

For New England residents interested in attending a two-year institution, both eligibility rules apply.

the graduate level

Benefits

Students meeting the eligibility requirements for residents of their state, and the admissions requirements of the institution to which they are applying, will, as is the case on the undergraduate level, be charged only the in-state tuition upon admission to that institution. At the state colleges, students applying for admission under the Regional Student Program receive admissions preference among out-of-state applicants.

Eligibility

Eligibility rules are the same for the graduate as for the undergraduate level. Only Eligibility Rule 1 – "The Uniqueness Rule" – applies to programs offered at state universities. Both rules apply to residents of **Connecticut, Massachusetts, Rhode Island** and **Vermont** wishing to apply to a program offered at a state college in one of those four states. Only Eligibility Rule 1 is applicable to programs offered in **Maine** or **New Hampshire** or to residents of those states applying for admission elsewhere.

How to Apply

For necessary forms and detailed information, inquiries should be directed to the dean of the graduate school at participating universities or to the director of admissions at participating state colleges. Applicants must clearly indicate, both in their initial inquiries and on their application forms, that they are seeking admission under the terms of the New England Regional Student Program. Those seeking admission to a general subject area, e.g., history, must specify precisely the area of specialization they wish to follow. Applicants may be required, in the case of university programs, to obtain certification from the dean of the graduate school of their home state university to the effect that the program of study desired is not available at the home state university.

the contract program

The New England Board of Higher Education presently administers the following student space contract programs:

Occupational Therapy – undergraduate level for residents of Massachusetts

Physical Therapy – undergraduate level for residents of Massachusetts

Dental Medicine – professional level program for residents of Maine

Medicine – professional level program for residents of Maine, Massachusetts and Rhode Island

Veterinary Medicine – professional level program for residents of Connecticut, Maine, Rhode Island and Vermont

NEW ENGLAND REGIONAL STUDENT PROGRAM

ENROLLMENT REPORT

HIGHLIGHTS 1975-76

- 3,241 students enrolled in 554 degree programs at 65 institutions
- 443 students enrolled in Health Professions Contract Programs including, for the first time, veterinary medicine
- 9.86 percent Regional Student Program enrollment increase over 1974-75
- New Hampshire and Connecticut continue as net exporters of regional students
- Largest institutional increases of Regional Student Program enrollment recorded by Northern Essex Community College (MA), Lyndon State College (VT) and University of Rhode Island

TOTAL REGIONAL STUDENT PROGRAM ENROLLMENT

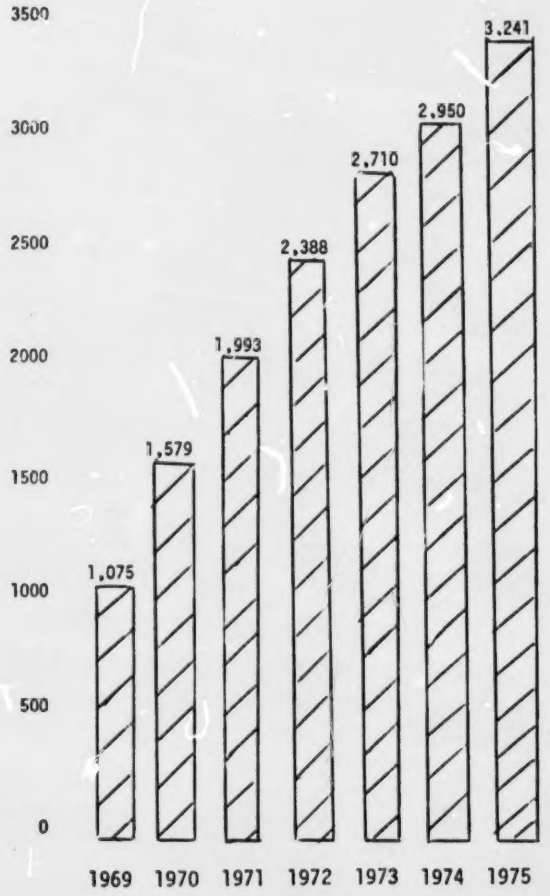
Enrollment in the New England Regional Student Program increased by 291 students in 1975-76 to a record level of 3,241 students, the highest enrollment since the program was initiated in 1958 with 302 students. The Regional Student Program enrollment gain represents an increase of 9.86 percent over 1974-75.

In addition, the number of students enrolled in contract programs administered by NEBHE increased from 322 students to 443 students for a grand total of 3,684 New England residents enrolled in regional programs in 1975-76.

FIGURE 1

EXPANSION OF REGIONAL STUDENT PROGRAM

1969-75



SECTORAL ENROLLMENT

Regional Student Program enrollment in 1975-76 increased in all sectors of New England public higher education except the university undergraduate sector. The highest percentage gain was recorded by four-year colleges, followed by graduate level university programs and two-year colleges. In addition, the number of New England students studying under contracts increased from 322 to 443 in 1975-76.

FIGURE 2

REGIONAL STUDENT PROGRAM ENROLLMENT
(by sector)

	1974-75	1975-76	Percentage Change
University Graduate	442	599	+35.52%
University Undergraduate	1,191	1,131	- 5.03%
Four-Year Colleges	301	427	+41.86%
Two-Year Colleges	1,016	1,084	+ 6.69%
Total	2,950	3,241	+ 9.86%
Contracts	322	443	+35.57%
TOTAL	3,272	3,684	+12.59%

REGIONAL STUDENT PROGRAM ENROLLMENT BY STATE

In examining the in-and-out migration of regional students by state, in general, trends begun in 1973-74 continued through 1975-76. In Connecticut and New Hampshire, which continued to be net exporters of regional students - i.e., more residents of those states migrated out to study programs offered in the Regional Student Program in the other four New England states than residents from the other New England states migrated in to study in these programs - the difference increased in 1975-76.

In order of magnitude, the following New England states continue to be net importers of regional students: Massachusetts, Vermont, Rhode Island and Maine. Of these four states, only Maine decreased its net importer status in 1975-76; in the other three states the discrepancy between in-flow and out-flow increased in 1975-76.

TWO-YEAR COLLEGES AND INSTITUTES

Previous dramatic annual increases in Regional Student Program enrollment at two-year colleges and institutes appear to have leveled off in 1975-76, with only 68 additional regional students enrolled in that sector. (See Figure 2.) Two-year colleges in Connecticut and Maine enrolled fewer regional students in 1975-76, Vermont about the same, and Massachusetts and New Hampshire enrolled more regional students in the two-year college sector.

The largest gain in two-year regional program students occurred in Massachusetts, where two colleges, Mt. Wachusett and Northern Essex, increased their enrollments of New Hampshire residents by 97. New Hampshire Vocational-Technical Colleges at Laconia and Manchester expanded their regional student enrollment by 26 students, enrolling increased numbers of Connecticut and Vermont residents.

RESIDENCE TOTALS	205	61	211	326	179	102	1084

FOUR-YEAR COLLEGES

The four-year state colleges increased their regional student enrollment by 126, slightly more than the gain of 111 students recorded last year. (See Figure 2.) Six of the 126 students were recorded as graduate students.

The notable gain occurring in Vermont in this sector (from 154 to 239) is almost entirely due to expanded enrollment at Lyndon State College where large numbers of Connecticut and Massachusetts residents are enrolled in the Park and Recreation Services Administration program.

UNIVERSITY UNDERGRADUATE LEVEL

Enrollment of regional students at the university undergraduate level declined in 1975-76 in every state except Massachusetts and Rhode Island. (See Figure 2.) Out-migration of regional students at this level increased from the states of Vermont and Connecticut.

The decline of Regional Student Program enrollment at this level centers around the three northern tier universities - Vermont, New Hampshire and Maine - and Connecticut in the southern tier. In the case of Connecticut, Vermont and New Hampshire, the withdrawal and phase out of popular regional programs in Occupational and Physical Therapy has lowered their regional enrollment each year. The University of Vermont is a unique case in that the University is in the process of withdrawing all but two of its regional programs.

If current trends continue, next year, for the first time, Regional Student Program enrollment at two-year colleges and institutions will surpass regional enrollment at the university undergraduate level.

Regional programs such as Environmental Design (U/Mass-Amherst) and Pharmacy and Library Science (URI) continue to attract large numbers of regional students.

UNIVERSITY GRADUATE LEVEL

Regional student enrollment at the university graduate level increased by 157 students with all states except Vermont registering gains. (See Figure 2.) Connecticut and Rhode Island were the largest gainers, accounting for 69 percent of the total increase (109 students). Law (U/Conn and U/Maine), Social Work (U/Conn), and Library Science (URI) continue as attractive graduate programs for regional students.

HEALTH PROFESSIONS CONTRACTS

The 1975-76 increase (121) in the number of students enrolled under health professions contracts administered by NEBHE reflects the continuing expansion of the contract program for Massachusetts residents in the fields of Physical and Occupational Therapy at Boston, Tufts, and Northeastern Universities and the addition of 13 contract spaces for residents of Connecticut, Maine, Rhode Island and Vermont at the University of Pennsylvania in the field of veterinary medicine.

Because Connecticut did not appropriate funds, the contract between that state and the Massachusetts College of Optometry was discontinued in 1975-76.

SUMMARY

As the 1975-76 enrollment data indicate, the New England Regional Student Program continues to involve increasing numbers of New England residents. The continuing vitality of the program demonstrates its ability and effectiveness in meeting the needs of New England residents desiring academic programs unavailable in public institutions in their own states.

At the same time, the 1975-76 Regional Student Program enrollment data indicate two concerns - the tendency of some states to become either constant net exporters or net importers of regional students, and the reluctance of some universities to offer regional programs to undergraduate students. A strengthened commitment by state and institutional leaders to regional cooperation will assure the continued growth and improvement of the Program.

Rodney J. Hinkle
Program Director,
Regional Liaison and Exchange

*Program in process of being phased out of Regional Student Program.

The New England Board of Higher Education is a public agency authorized by the New England Higher Education Compact, a formal interstate agreement among the six states ratified by the United States Congress in 1955. The Board was established to develop, direct and promote activities which increase educational opportunities and efficiently utilize all of the region's higher educational facilities. The Compact specifies that a coordinated interstate program of higher education shall be established and maintained by the Board, and that the Board shall assist the states and all institutions of higher education in the region in their common efforts to provide high quality education. The Board thus serves as a catalytic agency which crosses New England state boundaries in the interests of higher education.

The Board initiates and develops areas of cooperation and mutual interest among the more than 260 universities, colleges and institutes, both public and private, in New England. The Board is further charged with a responsibility to provide factual and evaluative data of relevance to these purposes.
The following functions are primary in achieving the Board's purposes:

- To provide a facility and staff capable of continuous research and evaluation relevant to higher education in New England
- To serve as a center for the collection and dissemination of information pertinent to the institutions and agencies concerned with higher education
- To serve as an administrative and fiscal agent for higher educational contracts and agreements among the institutions and governments in New England
- To provide consultative services on educational topics of major regional significance to the institutions, agencies and governments of New England
- To serve as a vehicle for the regional implementation of federally and privately financed programs related to higher education

Each state is represented on the Board by members of academic, professional, governmental and citizen groups appointed by the governor and legislature of each state. Each state delegation annually elects a chairman who serves on the Board's Executive Committee.
